

WATER BREAK REPAIR POLICY

1. Water breaks that occur on a line with water users, repair work will be given top priority over other public works.
2. Where a break occurs on a line where there are no users, repairs can proceed on a casual basis.
3. The break shall be isolated by valves so as to affect as small an area as possible. Those users affected shall be advised by personal contact and flyer of the problem.
4. If possible, water pressure should be provided occasionally at a predetermined time to allow isolated users an opportunity to draw water.
5. Crew shall use Town equipment where possible to complete repairs, however, the Foreman shall have authority to rent or contract additional men and equipment that may be required.
6. Repair operations will continue on a twenty-four hour basis until the break is completed.

ADOPTED BY COUNCIL September 12, 1988
RESOLUTION NUMBER 519-88
